## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 & 51, drawn to an evaporation mask apparatus, classified in class 118, subclass 504.
- II. Claims 10-41, drawn to method of manufacturing an organic electroluminescent device, classified in class 445, subclass 25.
- III. Claims , drawn to an organic electroluminescent device, classified in class 313, subclass 512.

Inventions Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process can be practiced by use of a plurality of evaporation masks to form the features of the device as oppose to the one mask such as the claimed apparatus.

Inventions Group II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the electroluminescence device can be formed

Art Unit: 2879

using a plurality of evaporation masks as oppose to the one mask as claimed in the method.

Inventions Group I and III are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In the instant case, the electroluminescence device can be formed using a plurality of evaporation masks as oppose to the one mask such as the claimed apparatus.

Furthermore, If Group I is elected, a restriction directed to the following patentably distinct species of the claimed invention applies as follows;

Species 1a: Claims 1-6 & 51, figure 4.

Species 1b: Claims 7-9, figure 14.

If Group I is elected, a restriction directed to the following patentably distinct species of the claimed invention applies as follows;

I. Claims 10-22 & 34-38, figure 13.

II. Claims 23-33 & 39-41, figure 18.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Art Unit: 2879

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
